Corporate Brochure

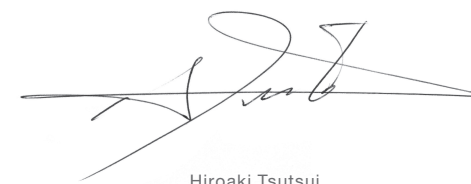

## every day is a new day.

From yesterday to today and into tomorrow...  
time continues to flow, pushing us forward with increasing speed.  
But even in these fast-moving times, the newest day is always today.  
“every day is a new day” —this is the motto that has been  
incorporated into our company name, NISSIN SHOJI.

Since our establishment in 1950, we have supported society  
with energy and its power to move things,  
and we strive to offer new value that move people’s hearts.  
In response to the diversifying needs of society,  
our field of work has expanded beyond the energy industry  
into businesses for everyday life.

We will continue to pursue ideas that help enrich people’s lives  
and improve our society and our future.  
At NISSIN SHOJI, “every day is a new day” —  
and we will continue to greet each day with a renewed sense of purpose.

## Message

Hiroaki Tsutsui  
President

Placing our trust in the power of energy to  
move things, we help sustain the connec-  
tions between people and society.  
Our goal is to create new ways to help  
society by embracing change.  
We will stand by the hearts of all, and strive  
towards a future where we can all smile  
together.

Petroleum is an important energy source in the lives  
of the Japanese people and in industrial activities,  
and petroleum products and by-products are  
indispensable in daily life. Since NISSIN SHOJI was  
founded in 1950, we have sold petroleum products as  
a distributor of Nippon Oil Corporation (currently  
ENEOS Corporation). Currently, we support general  
consumers and logistics through gasoline and diesel  
oil sales; supply a wide range of industrial petroleum  
products, including those for factories, power  
generation, and shipping; promote basic businesses  
that support society, such as the development of  
industrial and agricultural materials products; and are  
expanding our business to include sustainable energy  
and real estate.

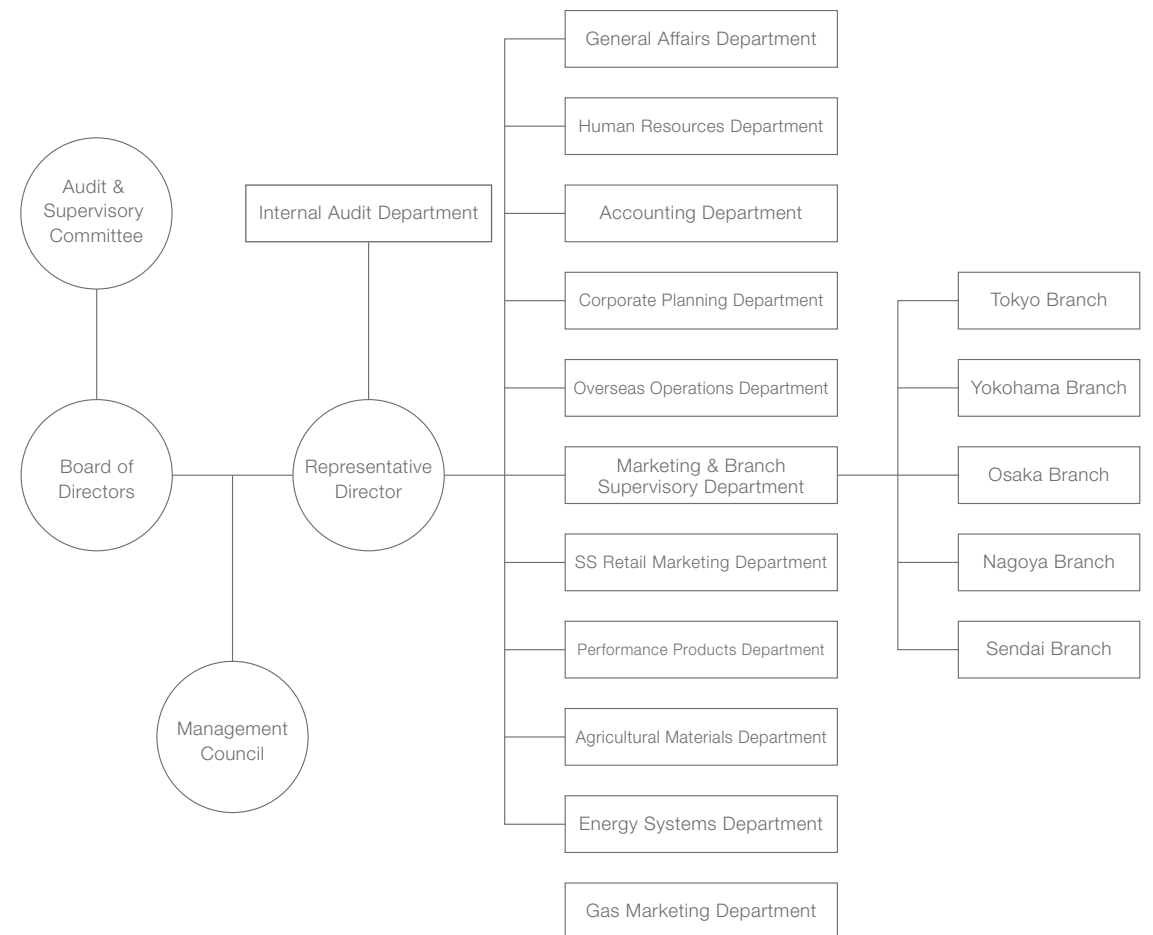

In this age of multipolarity and complexity, where the  
environment and values are constantly changing, we  
will strive to create new value by discerning the  
essence of things and contributing to the true  
enrichment of society.

## Our History

# Organization

Trade name:	NISSIN SHOJI CO., LTD.
Date of establishment:	February 1,1950 (founded on August 7,1947)
Paid-in capital:	3,624 million yen
Stock listing:	Tokyo Stock Exchange (Standard) (securities code: 7490)

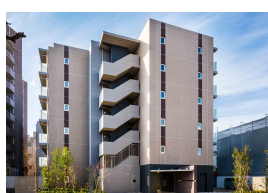

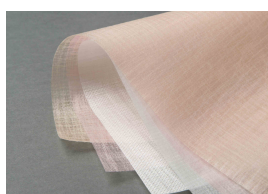

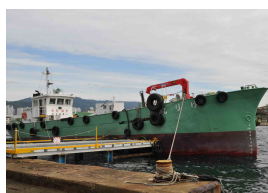

# Business Areas

Centered on the petroleum business, we have valued the stable supply of energy as our social mission since our founding. Today, we extend this commitment to encompass all types of energy supply with an increased emphasis on sustainable energy; we offer a variety of services across numerous fields, including the real estate sector. Through these efforts, we aim to evolve further as a company, standing by the hearts of all and striving towards a future where we can all smile together.

## Petroleum Business

Our core business, our petroleum business, is composed of three sectors: Service Station Retailing Sector, Supply and Marketing of petroleum products Sector and Service Station Management Sector. In Service Station Retailing Sector, we directly operate service stations (SS) under the ENEOS brand in four urban areas: Tokyo, Yokohama, Osaka and Nagoya. In addition to selling gasoline, diesel and kerosene, we also offer auto products like tires, batteries and oil, as well as washing and coating services. We also provide vehicle inspection services at designated and certified service stations, the purchase and sale of auto insurance and used cars, and light sheet metal work. With a new perspective, we aim to become a "service station trusted and supported by customers."

In Supply and Marketing of petroleum products Sector, we handle all petroleum products sold to private companies and government offices. We offer fuels like light and heavy oils, which are used by factories, power generation, government agencies and in cars, as well as lubricants used for jobs like auto maintenance and industrial processes. We also monitor domestic and international economic conditions, mainly crude oil prices, which fluctuate daily, and we examine various issues related to the use, price, and supply of petroleum products. Combined with the expertise we have accumulated over many years, we offer a wide range of solutions and services beyond product sales. These include energy conservation, cost reduction, minimizing environmentally hazardous materials, delivery by lorries, fuel cards for corporate customers, bicycle-sharing in Sakai City, Osaka, and collaborative initiatives in carbon management consulting. Service Station Management Sector sells a variety of petroleum products to ENEOS service stations and provides service station management support. In addition to proposing products and services that meet the needs of each service station's commercial area, such as car washing, vehicle inspections, insurance, auto maintenance products, and sheet metal repairs, we also use our expertise to offer sustainable management support through training sessions, sales planning, and asset utilization.

## Sustainable Energy Business

NISSIN SUWA SOLAR POWER STATION

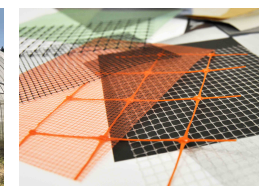

In our sustainable energy business, we mainly deal with equipment for solar power stations, along with biomass and other renewable energy sources. We also own solar power stations in Nagano Prefecture and elsewhere, and are active in the power sales field. In addition to equipment sales, we also provide consulting and support for the construction and installation of solar power facilities. In line with our business expansion into the agricultural field in recent years, we launched SMART AGRI SYSTEM that simultaneously generates power and supplies hot water using hybrid panels.

## Agricultural Materials Business

Greenhouse

In our agricultural materials business, we coordinate the entire greenhouse facilities for higher yield and quality as well as providing agricultural covering sheets and other materials. We contribute to the improvement of crop productivity both domestically and internationally, including sales to Southeast Asia in addition to Japan.

## Liquid Gas Business

GAS Department Yokosuka Local Office

In our liquid gas business, we engage in wholesale and retail sales of propane gas, which is mainly used as fuel at homes, businesses, various industries, and in automobiles. We also offer a wide range of services, such as sales of gas equipment and consultation for home renovations to provide support for safe and secure living.

## Real Estate Business

EDIAN Megurohoncho

In our real estate sector, we are moving into the leasing business to make use of real estate assets, such as SS and former facility sites. Today it has developed into a wide-ranging leasing operation to respond to real estate needs, including rental apartments in the Tokyo metropolitan area, office buildings and commercial facilities like convenience stores. Thanks to long-term ownership, all of these are stable sources of income.

## Industrial Materials Business

Synthetic resin raw materials

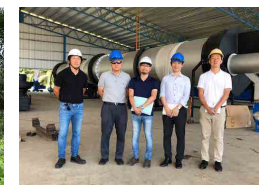

In our industrial materials business, we handle various specialty chemicals such as synthetic resin raw materials, packaging materials, nonwoven fabric materials, and reflective materials. In addition to meeting strict quality and cost requirements, we also incorporate environmentally friendly materials. Proposing products that meet the various needs changing with the times, we support industries in adding higher value to their products through our raw materials.

## Overseas Business

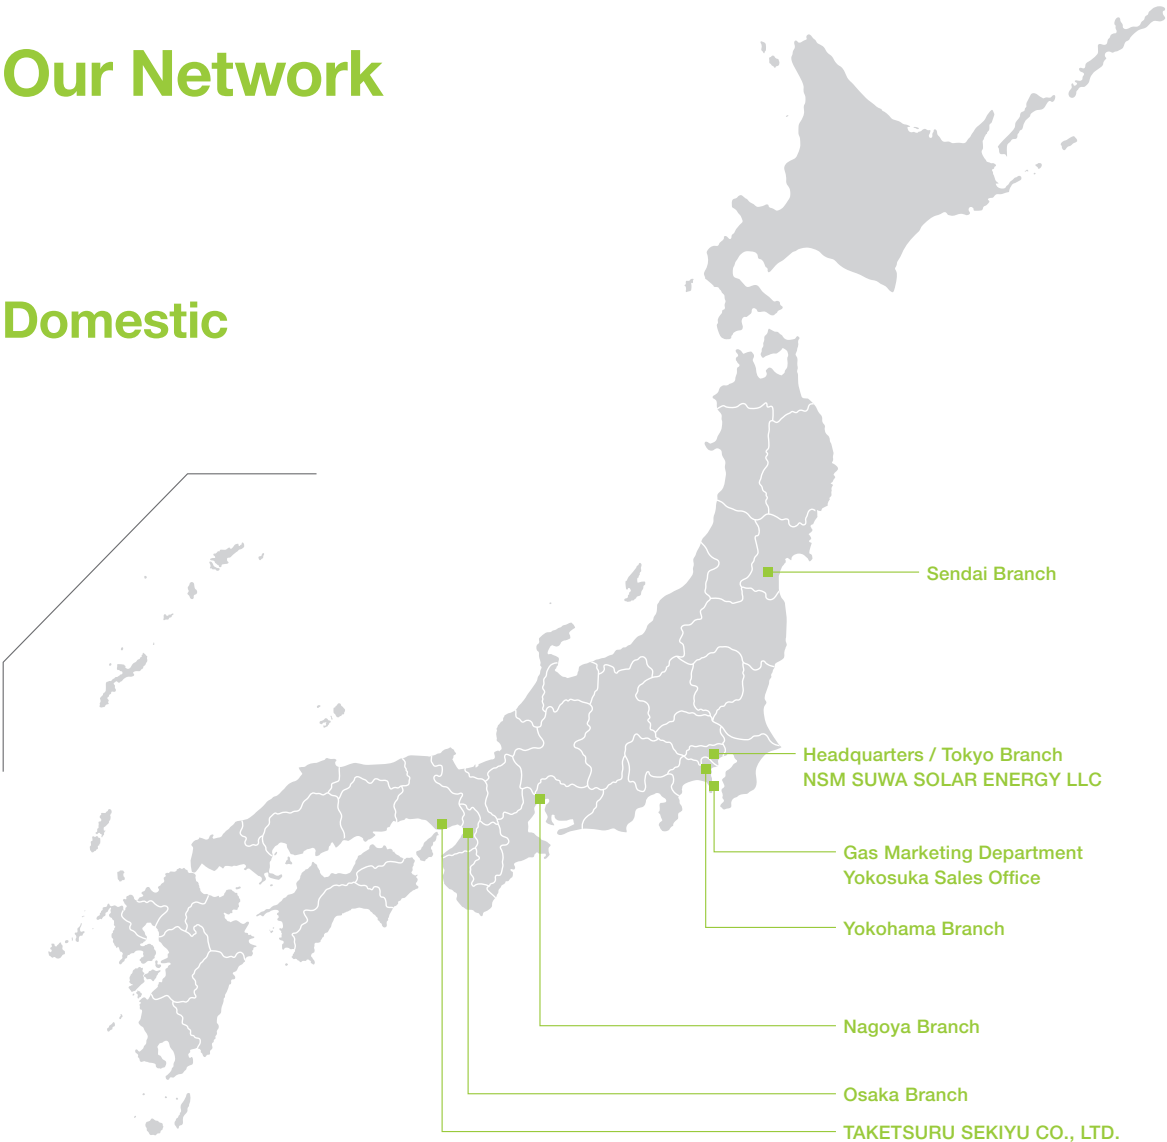

Facility that produces fuel for biomass power generation

We have selected businesses tailored to each country to leverage our strengths, with subsidiaries established in Malaysia and Vietnam. In Malaysia, our primary focus is selling petroleum and petrochemical products, as well as strengthening our sustainable energy business through the sale of fuel for biomass power generation. In Vietnam, we became the first foreign-owned company licensed to sell lubricating oil, alongside our petroleum product sales.
